<sup>1</sup> Output refers to real gross domestic product originating in the sector.

<sup>2</sup> Hours of all persons engaged in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

<sup>3</sup> Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

<sup>4</sup> Hourly compensation divided by the consumer price index for all urban consumers (CPI-U) for recent quarters. The trend from 1978–2004 is based on the consumer price index research series (CPI-U-RS).

<sup>5</sup> Current dollar gross domestic output divided by the output index.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they therefore may differ slightly from percent changes based on indexes shown here.

Data beginning 2001 were revised to reflect the recent revisions for the nonfarm payroll series. Hours and related measures revised historically to fully incorporate data on hours by job based on most recent population weights. In addition, data for hourly compensation, real hourly compensation, and unit labor costs reflect new information on compensation from the national income and product accounts for 2005:III. See *Productivity and Costs*, release dated March 7, 2006, for details.

\* Data based on GDP data released on February 28, 2006.
